Country Risk Global Grading

2025 - SECOND QUARTER
GLOBAL OVERVIEW

NEW TRENDS

Q2 / 2025

Global economic growth is expected to reach 2.3% in 2025, a slowdown from 2.9% in 2024. The global economy continues to face major challenges: High tariffs that could potentially lead to broader economic inefficiencies, inflation, and global tensions—hurting the global economy in the long run, weak investment, sluggish productivity growth, and high levels of debt. Inflation is gradually declining, but risks remain, notably from geopolitical tensions (Russia–Ukraine war, China–Taiwan, South China Sea disputes and rising trade barriers, Israel–Iran, Gaza, Red Sea instability). These challenges weigh particularly heavily on low-income countries, threatening the achievement of sustainable development goals.

Eurozone – The Eurozone is expected to experience a modest acceleration in growth, reaching 0.8 % in 2025. Growth will be supported by recovering real household incomes, resilient labour markets, and anticipated gradual cuts in key interest rates by the ECB. However, political uncertainty in countries such as France and Germany may weigh on business investment and hiring decisions.

United States – The U.S. economy is forecast to grow by 0.8% in 2025, marking a slowdown compared to 2024. This reflects the impact of rising tariffs and increasing trade frictions. While the labour market remains solid and household consumption is holding up, uncertainty surrounding the policy direction of the newly reinstated Trump administration—particularly in terms of trade and regulation—could dampen business sentiment. The full economic impact of the tariff measures remains to be seen.

China and Asia – China is expected to experience a gradual slowdown in activity, with GDP growth forecast at 4.5% in 2025. While still significant, this rate marks a clear deceleration compared to previous years, driven by structural headwinds in the property sector and demographic shifts. In the rest of Asia, growth prospects vary across countries, but the region as a whole is expected to maintain growth above the global average, supported by strong domestic demand and external trade.

Senegal – Senegal was the only country downgraded this quarter, with its G-Grade lowered from 6.5 to 7. The downgrade reflects a significant rise in political and operational risk following a turbulent electoral period and the rapid arrival of a reformist administration. The new government has launched an assertive agenda, including the review of major public and private contracts—particularly in the energy and infrastructure sectors—which has raised legal and regulatory uncertainty for investors. At the same time, fiscal slippage and widening deficits have weakened public finances, while the temporary suspension of IMF support has added to the volatility. These developments have sharply increased the perception of risk around Senegal's policy stability and business environment.

NOTICE OF EXPLANATION

The G-Grade displays a grade between 1 and 10 measuring the perceived level of political risk in this country.

Grade 1 corresponds to the lowest perceived level of political risk.

On each country snapshot, you will notice :

- on the left side is the previous grade,
- on the centre is the current G-Grade,
- on the right side is the highest and the lowest risk assessment provided by the insurers.

All macro economic graphics have been prepared based on IMF (International Monetary Fund) statistics department information (World Economic Outlook Database).

In case of questions please address your request to : delapontais@au-group.com

ENABLING BETTER VISIBILITY ON WORLDWIDE RISKS

« The 'AU G-Grade' is a condensed overview based on the country risk assessments of the major credit insurers (ALLIANZ TRADE, ATRADIUS, COFACE & CREDENDO...). In addition, in order to provide you a complete picture of each country, we have selected 7 relevant KPIs issued by the IMF statistics department.

The AU G-Grade is displayed country by country, providing a rating evolution on a quarterly basis and also including the lowest and highest grade spreads from the insurers. Developed by AU Group, this complementary tool gives a solid trend analysis and indication of a country's risk, based on valuable grading of the most experienced insurers. »

LOUIS BOLLAERT, Chief Executive Officer
